Installation Guides

Floor Installation

Finishing Materials : carpet, ceramic tile, rubber tile, engineered wood and laminate

Elevated floor installation

SHERA Board Product

Square-cut edge, 15-20 mm. thick

Type of frame

Structural steel frame :

with a minimum thickness of 2.3 mm.

Hardwood frame :

with a minimum dimensions of 1 1/2 x 3 inches

Joint Spacing

One-way joist at every 60 cm.

Two-way joist at 60 x 60 cm.

Joint Spacing

One-way joist at every 60 cm.

Two-way joist at 60 x 60 cm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Painting

Apply epoxy for indoor application.

Apply polyurethane for indoor and outdoor application.

Sub-floor board installation on existing concrete floor

SHERA Board Product

Square-cut edge, 8-12 mm. thick

Board fixing tools

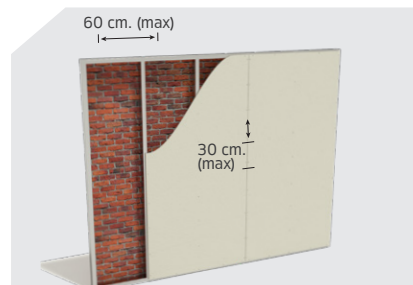

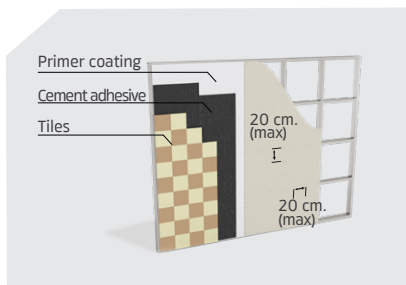

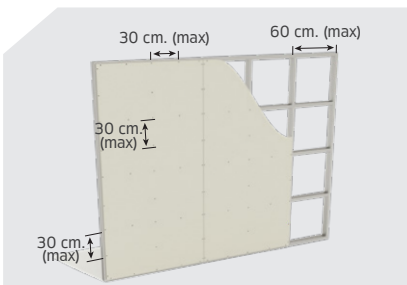

Use cement adhesive or polyurethane adhesive with hammer and 1-1.5" concrete nails.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Wall installation

Finishing Materials : wallpaper, tile, laminate

General wall application

SHERA Board Product

Square-cut edge, 6-12 mm. thick

for v-groove wall

Recessed edge, 6-12 mm. thick*

for smooth finished wall

Type of frame

U75 and C75 galvanized frame with a minimum thickness of 0.55 mm.

Joint spacing

60 x 60 cm. or 60 x 120 cm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

* Recessed edge profile 10-12 mm. thick is a made to order item

Tile wall installation

SHERA Board Product

Square-cut edge, 10-12 mm. thick

Type of frame

U75 and C75 galvanized frame with a minimum thickness of 0.55 mm.

Joint spacing

60 x 60 cm.

Fixing distance

At every 20 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Ceramic tile fixing tool

Cement adhesive

Brick wall installation alternative to plaster

SHERA Board Product

Square-cut edge, 6-12 mm. thick

Recessed edge, 6-8 mm. thick

for interior smooth finished wall

Type of frame

C-Line galvanized frame no. 24, 0.55 mm. thick

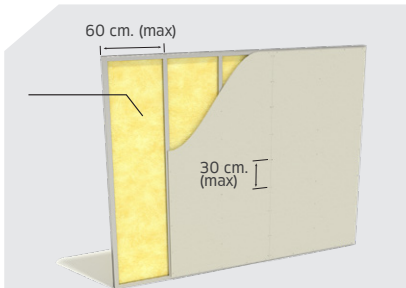

Joint spacing

at every 60 cm. with vertical joint attached to bracket such as BPB ML75

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Ceiling installation

Sound or thermal insulated wall installation

SHERA Board Product

Square-cut edge, 6-12 mm. thick

Type of frame

U75 and C75 galvanized frame with a minimum thickness of 0.55 mm.

Joint spacing

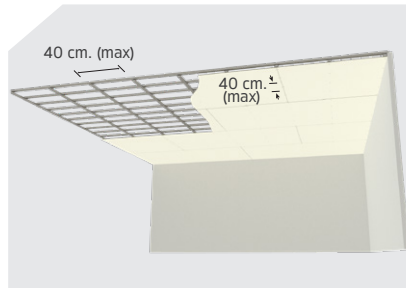

60 X 240 mm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Mid-layer material

Sound or thermal insulation

Steel frame installation

SHERA Board Product

Square-cut edge, 3.2-6 mm. thick

for v-groove ceiling

Recessed edge, 6 mm. thick

for smooth finished ceiling

Type of frame

C-Line galvanized frame no. 24

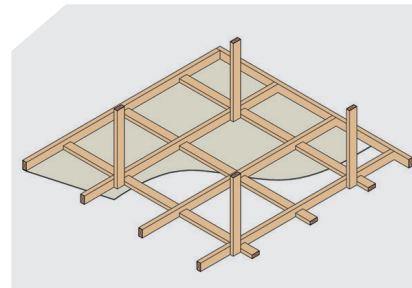

Joint spacing

Main section at every 90 cm.

Cross section at every 40 cm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Timber frame installation

SHERA Board Product

Square-cut edge, 3.2-6 mm. thick

for v-groove ceiling

Recessed edge, 6 mm. thick

for smooth finished ceiling

Type of frame

Hardwood frame with dimensions of 1 1/2 x 3 inches

Joint spacing

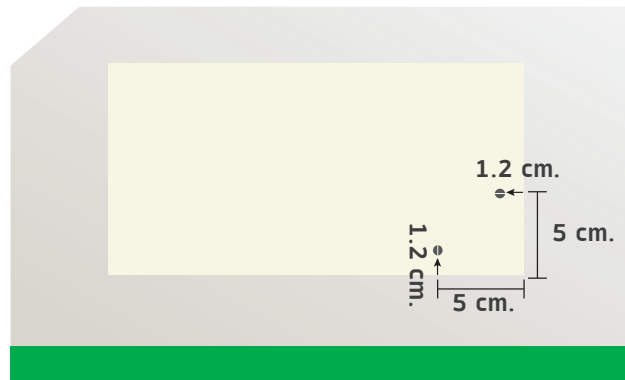

60 cm. x 60 cm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

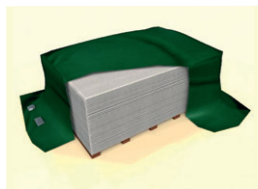

Tip on fixing the corners of SHERA Floor, Wall, Ceiling Board

Fix the screw at 1.2 cm. edge distance, with 5 cm. distance from the board's corner

Movement and Piling

Always raise the board vertically by raising the two ends

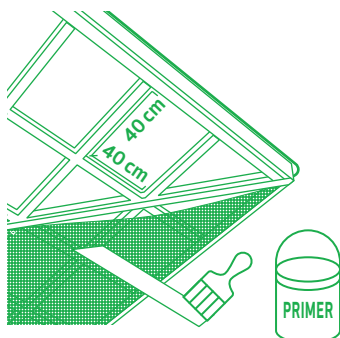

Pile the boards up at shady and on the flat and dry ground. The boards should be supported by 5 pieces of wood of 1.5"x3" wide as indicated in the schedule. Do not install and paint the board in wet condition.

Thickness (mm.)	Piling not exceeding (pcs)
4	300
6	225
8	150
10	120
12	105
15	90
18	75
20	60

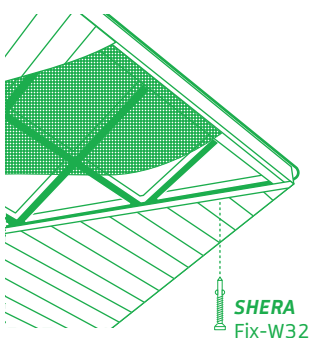

Installation Guides

Ceiling Application

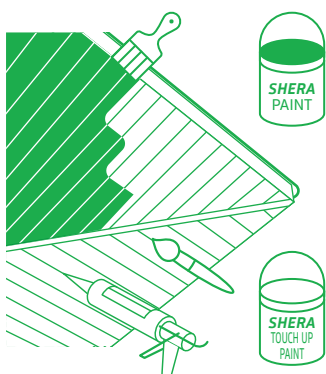

Installation Steps SHERA Uncolored Strip

- 1 Install steel studs spacing not more than 40 cm. apart and lay down the insect protection net.
- 2 Prime uncolored *SHERA* Strip prior to installation.

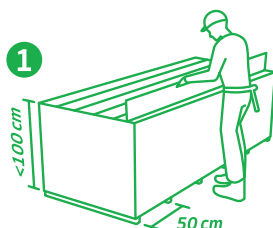

- 3 Fasten *SHERA* Strip to steel studs with screw at the middle from long-side edges.

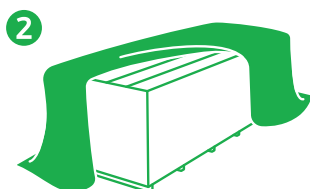

- 4 Caulk at all end joints and over the screw heads.
For Uncolored *SHERA* Strip
Clean up before painting.
For Colored *SHERA* Strip
Touch up the screw head after installed.

Handling & storage

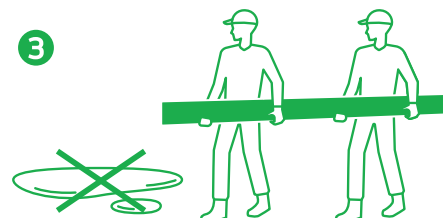

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

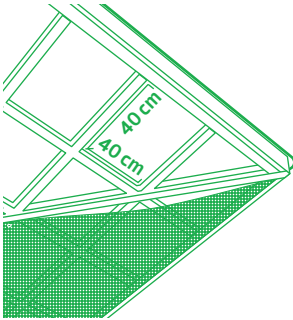

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

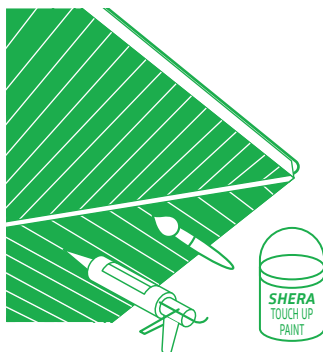

Installation Steps *SHERA* Colored Strip

- 1 Install steel studs spacing not more than 40 cm. apart and lay down the insect protection net.

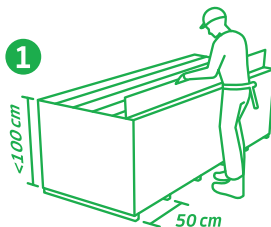

- 2 Fasten *SHERA* Strip to steel studs with screw at the middle from long-side edges.

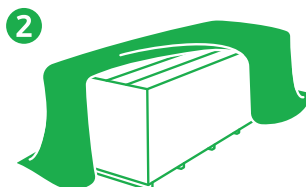

- 3 Caulk at all end joints and over the screw heads.
Apply touch-up paint over the screw head.

Handling & storage

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

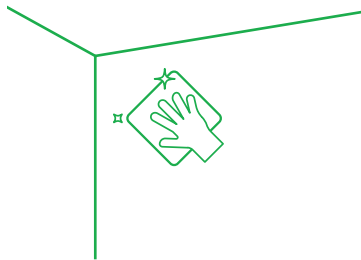

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

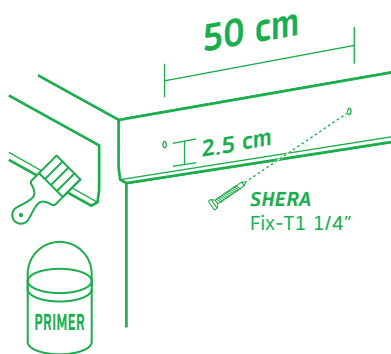

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

Installation Steps *SHERA* Ceiling Skirt

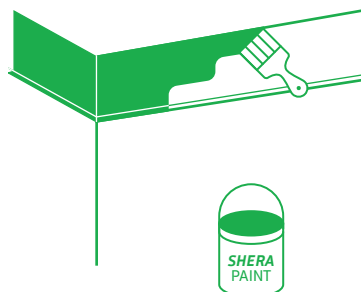

1 Clean up the product surface.

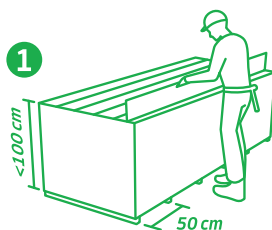

2 Prime uncolored *SHERA* Ceiling Skirt prior to installation.

3 Fastened *SHERA* Ceiling Skirt with screws at the middle from long-side edges, every 50 cm.

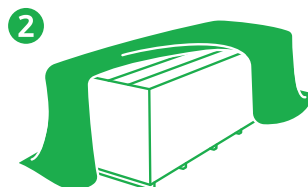

4 Caulk over the screw heads and clean up before painting.

Handling & storage

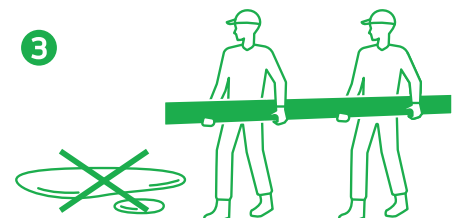

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

During a transfer, *SHERA* products should be handled at 50 cm from both ends.

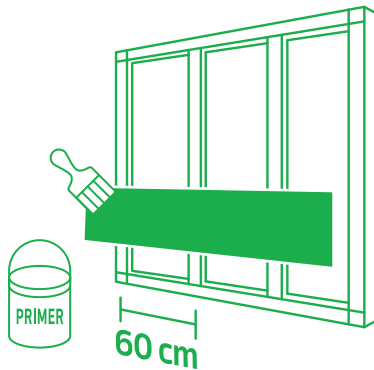

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

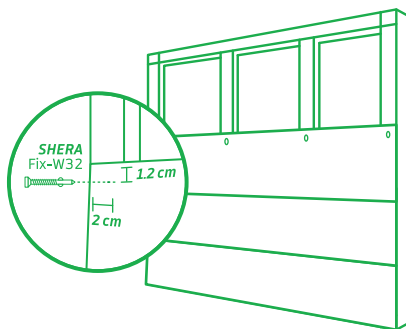

Installation Guides

Wall Application

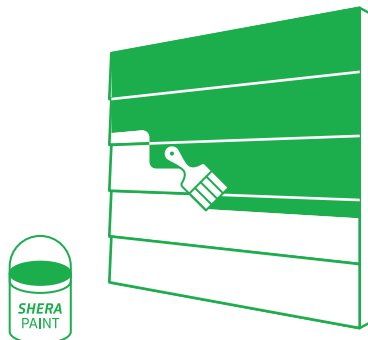

Installation Steps SHERA Uncolored Plank

- 1 Install steel studs spacing not more than 60 cm apart
- 2 Prime uncolored *SHERA* Plank prior to installation.

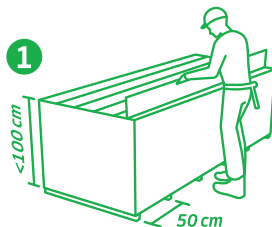

- 3 Fasten the plank to steel studs, with one on top of the other, from bottom of the wall to the top.
Recommended overlapping length is 2.5 cm and place the first plank with ground clearance of 2-5 cm to avoid direct contact with damp or water.

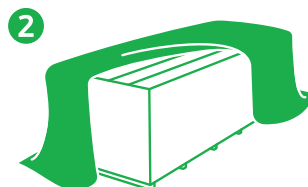

- 4 Caulk at all end joints and the corners of wall.
Clean up the plank before painting.

Handling & storage

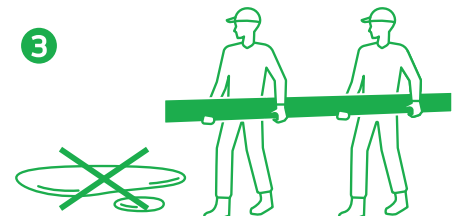

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

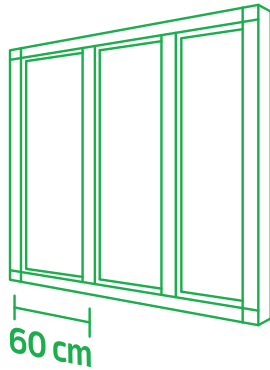

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

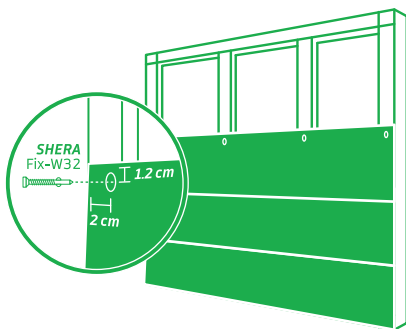

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

Installation Steps *SHERA* Colored Plank

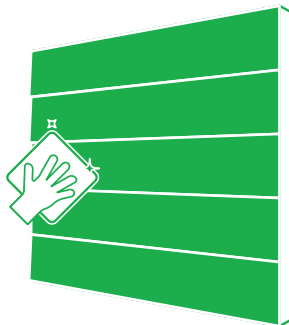

- 1 Install steel studs spacing not more than 60 cm. apart.

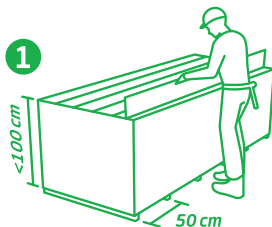

- 2 Fasten colored *SHERA* Plank to the steel studs with one on top of the other, from bottom of the wall to the top.

Recommended overlapping length is 2.5 cm and place the first plank with ground clearance of 2-5 cm to avoid direct contact with damp or water.

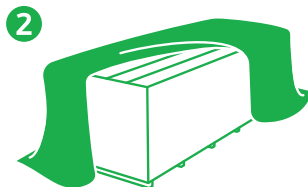

- 3 Caulk at all end joints and the corners of wall. Clean up the plank after installed.

Handling & storage

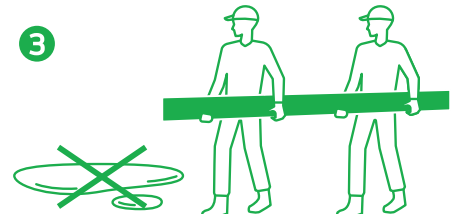

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

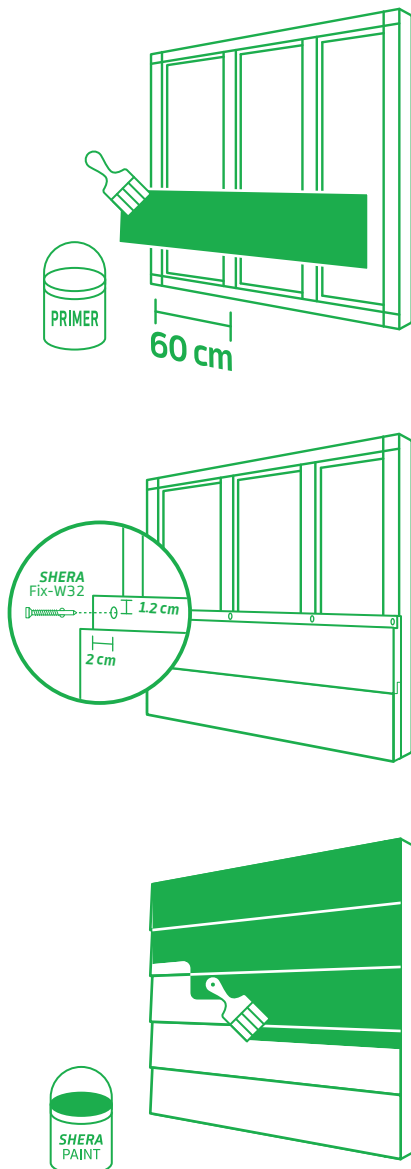

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

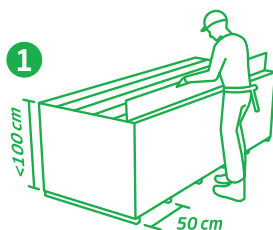

Installation Steps

SHERA Uncolored Splendid Plank

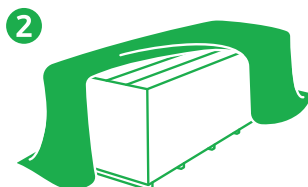

- 1 Install steel studs spacing not more than 60 cm. apart.
- 2 Prime uncolored *SHERA* Splendid Plank prior to installation.
- 3 Lay up the plank such that the tongues point toward the direction of installation.
Fasten the plank to the steel studs.
Cover the tongues with the next grooved edge next grooved edge of the plank to hide the screw heads.
Recommended placing the first splendid plank with ground clearance of 2-5 cm to avoid direct contact with damp or water.
- 4 Caulk at all end joints and the corners of wall.
Clean up the plank before painting.

Handling & storage

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

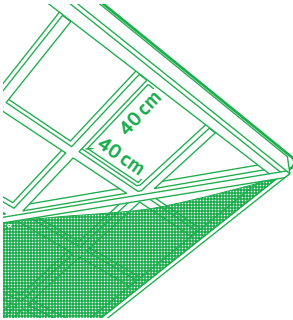

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

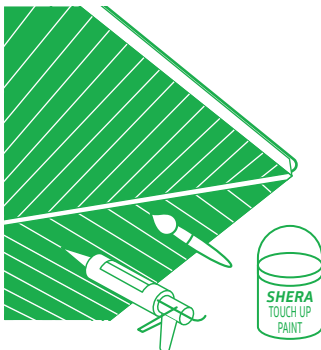

Installation Steps *SHERA* Colored Strip

- 1 Install steel studs spacing not more than 40 cm. apart and lay down the insect protection net.

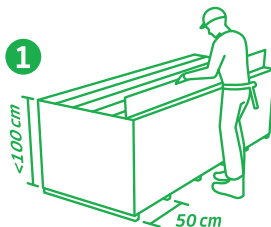

- 2 Fasten *SHERA* Strip to steel studs with screw at the middle from long-side edges.

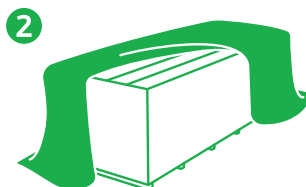

- 3 Caulk at all end joints and over the screw heads.
Apply touch-up paint over the screw head.

Handling & storage

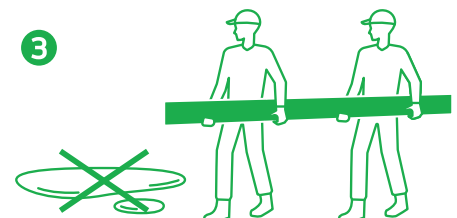

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

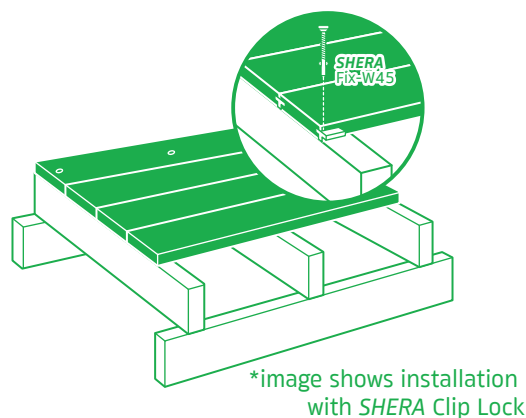

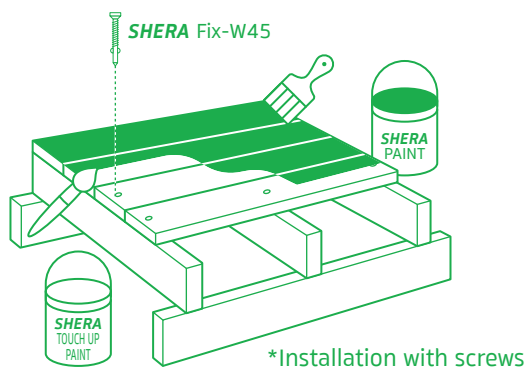

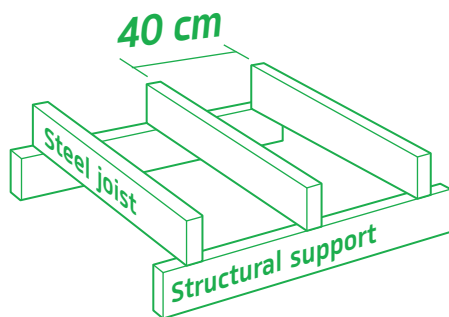

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

Installation Guides

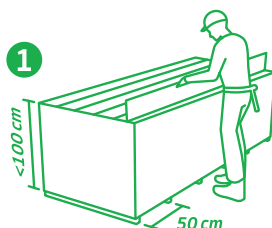

Wall Application

Installation Steps and Pre-primed Floor Plank

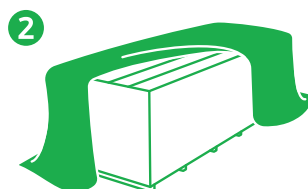

- 1 Install structural supports perpendicular with *SHERA* Floor Plank's direction spacing not more than 40 cm apart.
- 2 Fasten *SHERA* Floor Plank with screw at at 1.2 cm. from the long-side edges and 1-2 cm. from both wide-side edges.
- 3 Caulk the screw heads before applying touch-up paints for colored floor plank.
For Pre-primed *SHERA* Floor Plank, make sure the surface is cleaned before applying decking paint.
- 4 For Clip-lock *SHERA* Floor Plank series, fasten the first plank to steel stud with screw at 5 cm. from the edge.
Align *SHERA* Clip-Lock to the other side of the plank with one of its wing slotted into the plank's groove.
Screw the clip-lock to the steel studs holding the plank in place.

Handling & storage

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

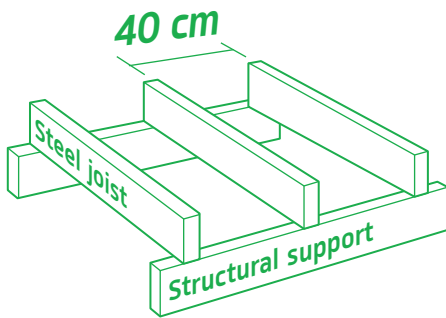

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

The product should be lifted such that its side is parallel to the floor.

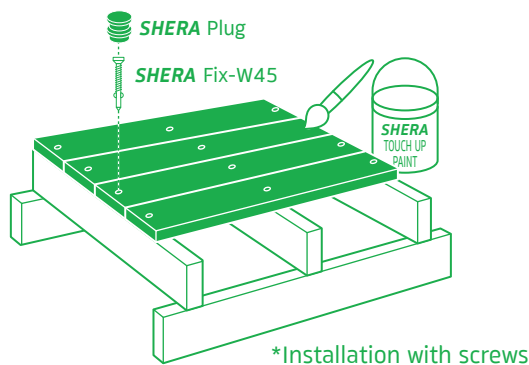

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

Installation Steps

SHERA Colorthrough Floor Plank

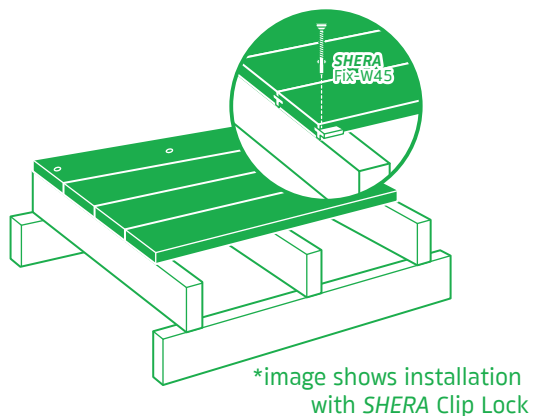

- 1 Install structural supports perpendicular with *SHERA* Floor Plank's direction spacing not more than 40 cm apart.

- 2 Fasten *SHERA* Floor Plank with screw at at 1.2 cm. from the long-side edges and 1-2 cm. from both wide-side edges.

- 3 Cover any mark with touch-up paints and screw head with *SHERA* Plug.

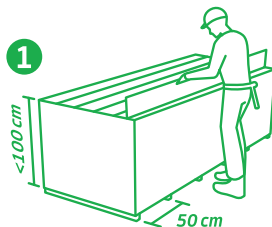

- 4 For Clip-lock *SHERA* Floor Plank series, fasten the first plank to steel stud with screw at 5 cm. from the edge.

Align *SHERA* Clip-Lock to the other side of the plank with one of its wing slotted into the plank's groove.

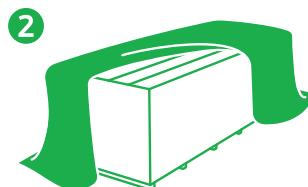

Screw the clip-lock to the steel studs holding the plank in place.

Handling & storage

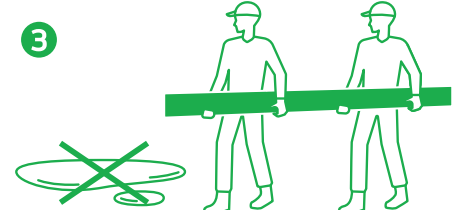

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

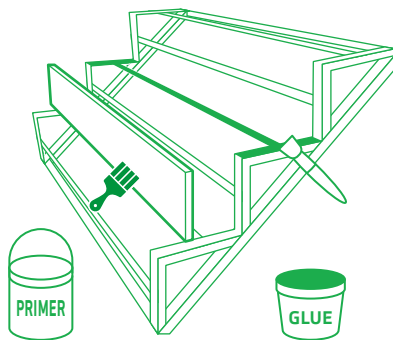

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

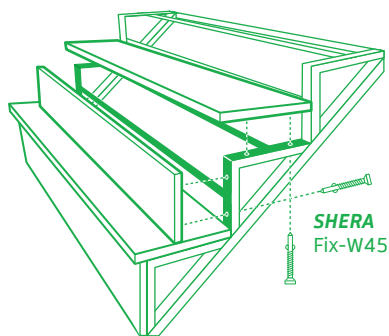

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

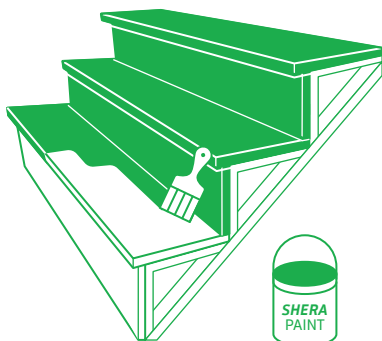

Installation Steps *SHERA* Stair

- 1 Install *SHERA* Stair on concrete slab or steel studs.

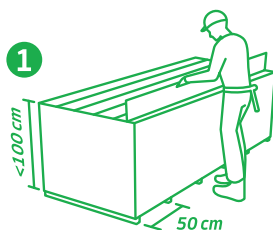

- 2 Prime all sides of uncolored *SHERA* Stair prior to installation and joint with *SHERA* Bond.
- 3 Fasten *SHERA* Stair to steel studs with screw.

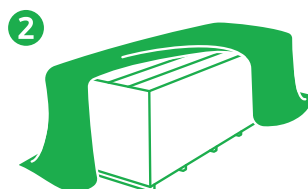

- 4 Caulk over the screw heads and clean up before painting.

Handling & storage

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

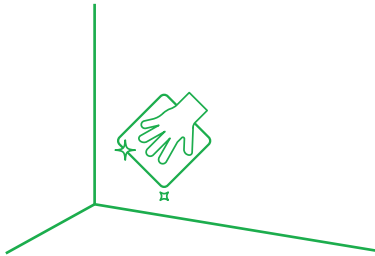

During a transfer, *SHERA* products should be handled at 50 cm from both ends.

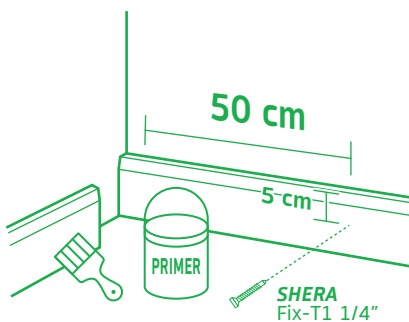

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

Installation Steps *SHERA* Skirt

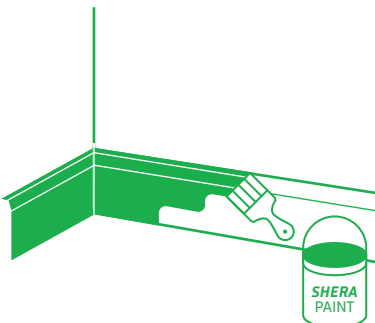

① Clean up the product surface.

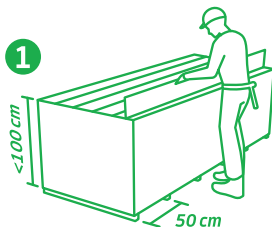

② Prime uncolored *SHERA* Skirt prior to installation.

③ Fastened *SHERA* Skirt with screws at the middle from long-side edges, every 50 cm.

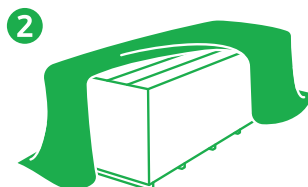

④ Caulk over the screw heads and clean up before painting.

Handling & storage

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

During a transfer, *SHERA* products should be handled at 50 cm from both ends.

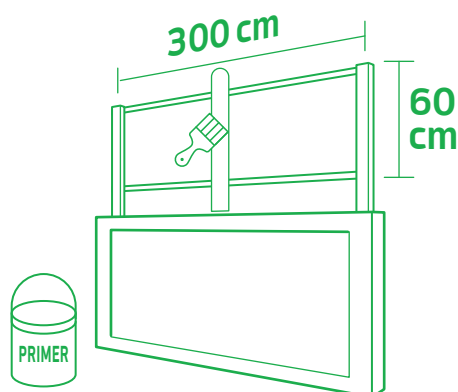

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

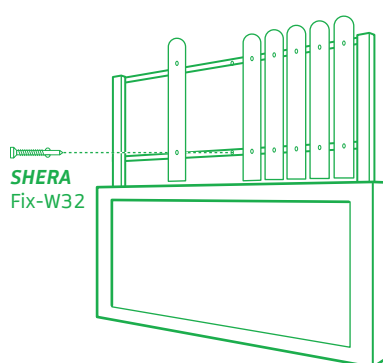

Installation Guides

Decorative Application

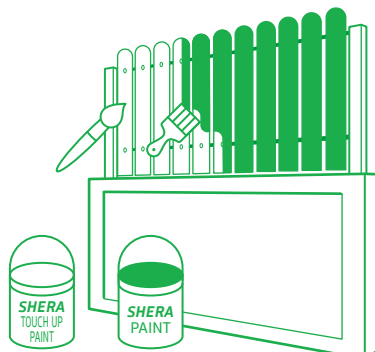

Installation Steps SHERA Fence

- 1 For vertical fences, install steel studs spacing not more than 60 cm apart and span length should not be more than 300 cm.

- 2 Prime uncolored *SHERA* Fence prior to installation.
- 3 Fasten *SHERA* Fence to steel studs with screw at the middle from long-side edges, every 50 cm.

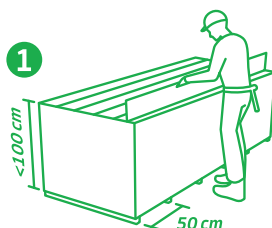

- 4 Caulk at all end joints and over the screw heads.

For uncolored *SHERA* Fence
Clean up before painting.

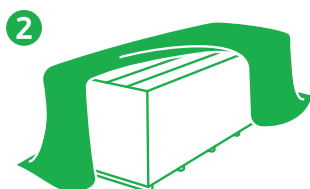

For colored *SHERA* Fence
Touch up the screw head after installed.

Handling & storage

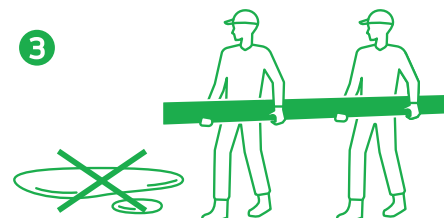

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

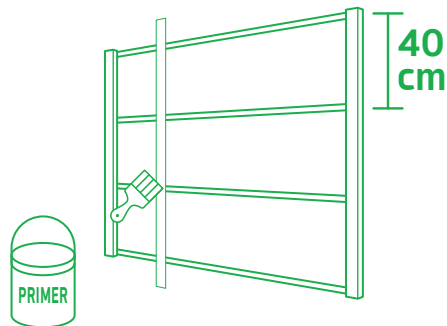

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

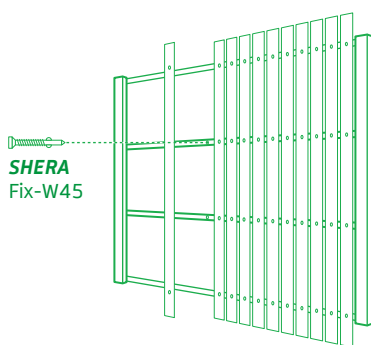

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

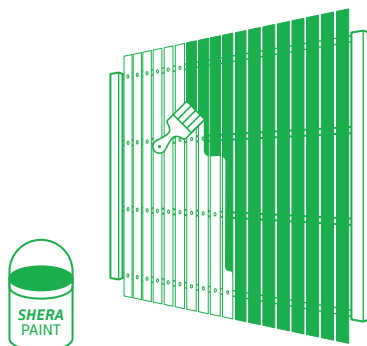

Installation Steps **SHERA Uncolored Deco Wood**

- 1 Install steel studs perpendicular with strip's direction spacing not more than 40 cm apart.

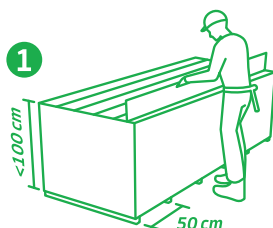

- 2 Prime uncolored *SHERA* Deco Wood prior to installation.
- 3 Fasten *SHERA* Deco Wood to steel studs with screw at the middle from long-side edges.

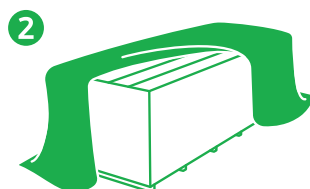

- 4 Caulk at all end joints and over the screw heads.
Clean up before painting.

Handling & storage

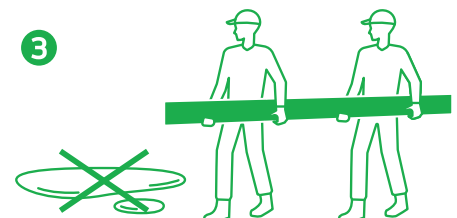

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

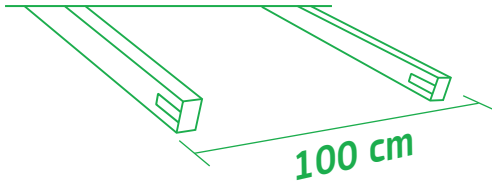

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

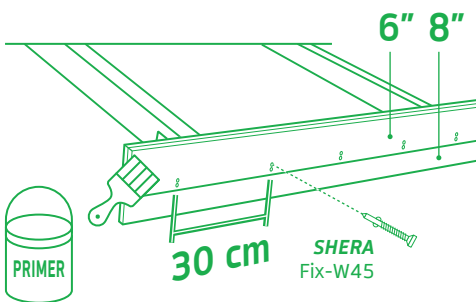

Installation Guides

Roof Application

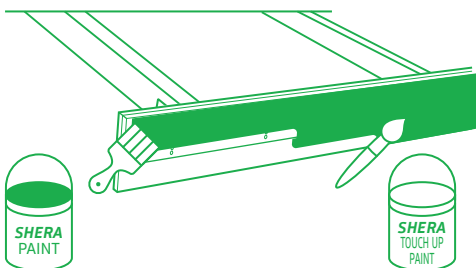

Installation Steps SHERA Uncolored Eaves

- 1 Install rafters spacing not more than 100 cm. apart.

- 2 Prime uncolored *SHERA* Eaves prior to installation.
- 3 Fasten *SHERA* 8" Eaves to the steel studs.
Lay *SHERA* 6" Eaves to partly cover *SHERA* 8" Eaves and screw the eaves together at every 30 cm.

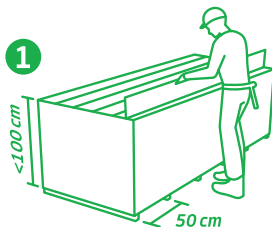

- 4 Caulk at all end joints and over the screw heads.

For Uncolored *SHERA* Eaves
Clean up before painting.

For Colored *SHERA* Eaves
Touch up the screw head after installed.

Handling & storage

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

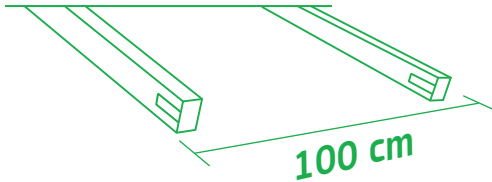

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

The product should be lifted such that its side is parallel to the floor.

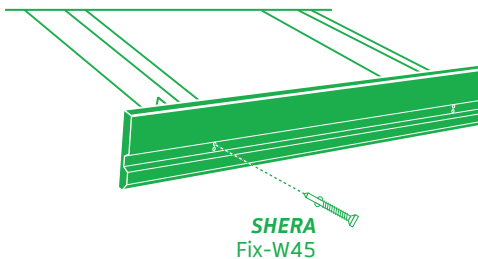

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

Installation Steps

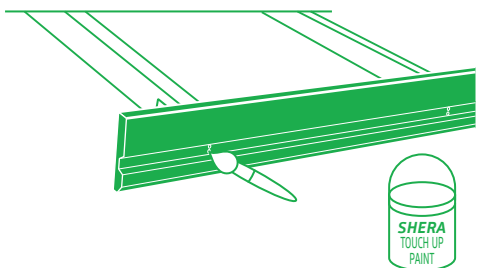

SHERA Colored Eaves Pro

- 1 Install steel studs spaced not more than 100 cm apart.

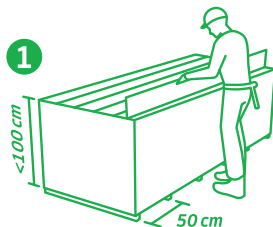

- 2 Fasten *SHERA* Colored Eaves to the steel studs with screw.

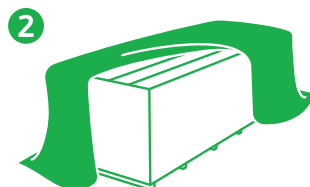

- 3 Caulk at all end joints and over the screw heads.
Touch up the screw head after installed.

Handling & storage

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

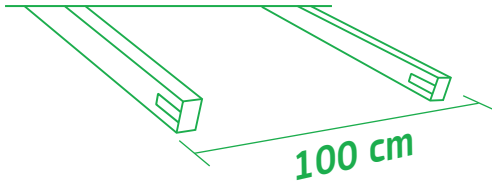

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

The product should be lifted such that its side is parallel to the floor.

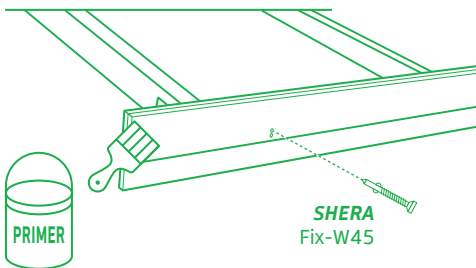

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

Installation Steps

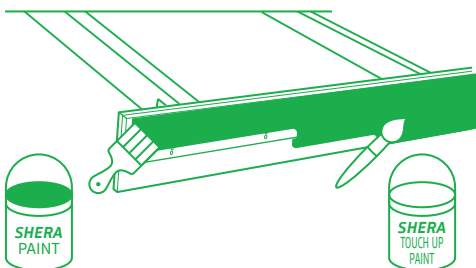

SHERA Colored Eaves One Plus

- 1 Install rafters spacing not more than 100 cm. apart.

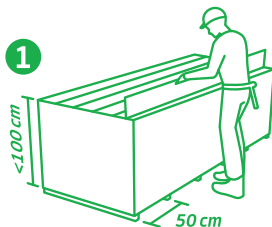

- 2 Prime uncolored *SHERA* Eaves prior to installation.
- 3 Fasten *SHERA* Eaves to the steel studs.

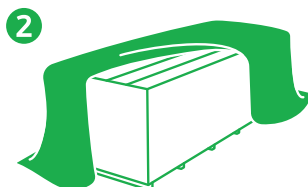

- 4 Caulk at all end joints and over the screw heads.
For Uncolored *SHERA* Eaves
 Clean up before painting.
For Colored *SHERA* Eaves
 Touch up the screw head after installed.

Handling & storage

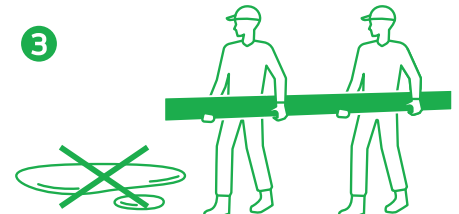

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

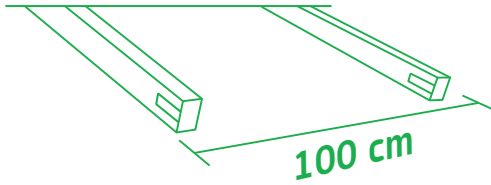

During a transfer, *SHERA* products should be handled at 50 cm. from both ends.

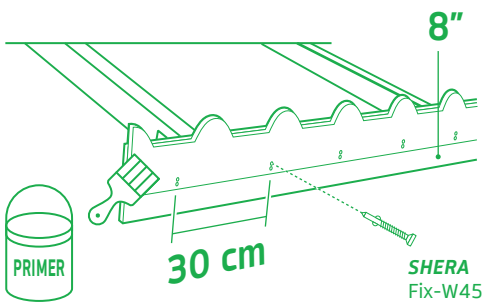

The product should be lifted such that its side is parallel to the floor.

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

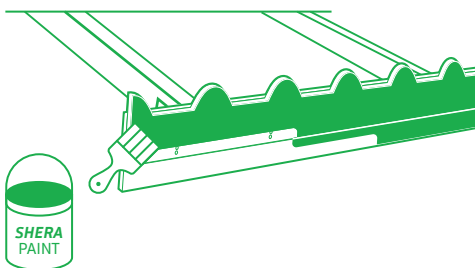

Installation Steps *SHERA* Eaves Filler Unit

- 1 Install rafters spacing not more than 100 cm apart.

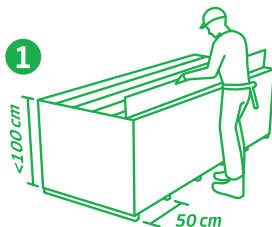

- 2 Prime uncolored *SHERA* Eaves Filler Unit prior to installation.
- 3 Fasten *SHERA* Eaves Filler Unit over *SHERA* 8" Eaves and screw the eaves together at every 30 cm.

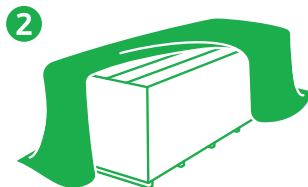

- 4 Caulk at all end joints and over the screw heads.
Clean up before painting.

Handling & storage

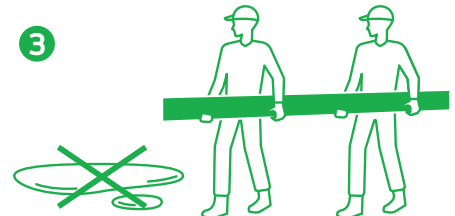

SHERA products should be handled and stacked carefully to avoid damages to their edges and corners.

The maximum height of stack is 1 meter with timber bearers supported at every 50 cm.

SHERA products should be stacked on dry and leveled ground.

It is recommended to store *SHERA* under shade to prevent damages that could occur to the product in case of prolonged exposure to high humidity environment prior to installation.

During a transfer, *SHERA* products should be handled at 50 cm from both ends.

The product should be lifted such that its side is parallel to the floor.

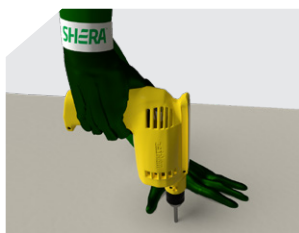

Avoid installing *SHERA* product under wet condition to reduce chance of cracking.

Tools and Equipment

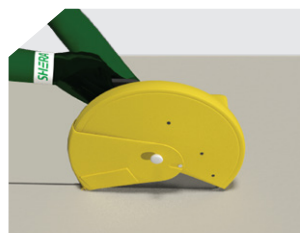

SHERA Board

Fiber cement cutter

Electric screw driver

Electric saw

Cutter

SHERA Concrete Bonding Agent

SHERA cement jointing compound

SHERA Acrylic Jointing Compound
For interior work; used for plastering joints of SHERA Wall Board, Recessed edge, together with SHERA fiberglass mesh tape.

SHERA flexible jointing compound

SHERA Flexible Jointing Compound
Smooth ceiling plastering work requiring high flexibility together with fiberglass mesh tape

SHERA fiberglass mesh tape

SHERA Fiberglass Mesh Tape
Used for taping the joints of SHERA Wall Board, Inclined edge

SHERA sealant PU25

For sealing joints of interior and exterior works

SHERA barrel gun

Used with Sealant
Size 310 and 600 ml.

SHERA screw fix - b

For steel structure
0.55-1.2 mm thick

SHERA screw fix - w

For steel structure
1-3.2 mm thick

SHERA screw fix - t

For wooden structure

Schedule of Recommended Fixing of SHERA BOARD with SHERA Screws

Structure Type	SHERA Screws to be used with SHERA BOARD having several thickness (mm)			
SHERA BOARD Thickness	3.2-6 mm.	6-8 mm.	10-12 mm.	15-20 mm.
Galvanized steel structure 0.55-1.0 mm thick	FIX-B20	FIX-W20	FIX-W25	Not recommended
Structural steel 1.0-3.2 mm thick	Not recommended	FIX-W25	FIX-W32	FIX-W45
Wooden structure	FIX-T11/4"	FIX-T11/4"	FIX-T11/4"	FIX-T11/4"

SHERA Wood

SHERA Plug

Perfect your floor without having to touch up screw heads with this new approach.

Packing : 250 pcs/box

SHERA Plug Consumption

Frame Spacing	SHERA Floor Plank Color Through	Area Coverage(m ² /box)
30 mm	25 x 150 x 3000 mm.	10
	25 x 200 x 3000 mm.	6.5
40 mm	25 x 150 x 3000 mm.	8
	25 x 200 x 3000 mm.	12.5

SHERA Flooring Clip-Lock Set

It is made for installing wood floor Clip-Lock models, to address all your needs. Whether applied on wood or steel structures, it is quick to install, and does not require touch-up paint on screwheads. The job is done easier and faster.

Packing : 36 pcs/box

SHERA Sealant PU 25

For jointing gaps
SHERA Product Packing 310/600 ml

SHERA Corner Piece, Smooth Texture

For internal and external wall cornering
Size (cm): 0.6 x 8 x 305

SHERA Barrel Gun

For using with SHERA Sealant PU 25
For both 310 ml and 600 ml

SHERA Acrylic Paint

Available for all colors for painting screw heads and wood cutting
Packing 0.525 liter Application quantity 10 sq.m./liter

SHERA Screw FIX-W

Screws for installing SHERA wood to wood sub frame. Screw heads are embedded firmly into the wood to create neater finish than conventional screws.

Quality Class: 2

Length (inch): 1 ½ and 1 ¾
Diameter: No. 8

Packing

FIX-W32G8 = 500 pcs/box
FIX-W45G8 = 250 pcs/box

SHERA Screw FIX-T

Screws for installing SHERA wood to wood sub frame. Screw heads are embedded firmly into the wood to create neater finish than conventional screws.

Quality Class: 2

Length (inch): 1 ½ and 1 ¾
Diameter: No. 8

Packing

FIX-T 1½ = 500 pcs/box
FIX-T 1¾ = 250 pcs/box
